PROFESSIONAL SUMMARY

Software Engineer experienced in full-stack development, building scalable, reliable, and user-focused web and cross-platform applications. Skilled in REST API integration, cross-functional collaboration, and delivering solutions in Agile environments.

EXPERIENCE

Mid Software Engineer – Full Stack Developer — Code Fusion IT Solutions

Sto. Tomas, Batangas

Jun 2025 – Jun 2026

- Collaborated with cross-functional team members to redesign the University Library Information Management System (LIMS) using ReactJS, Python, and PostgreSQL, improving reliability and reducing load time.
- Designed and integrated RESTful APIs connecting front-end applications with backend services and IoT data flows, enabling real-time synchronization across devices.
- Developed cross-platform desktop applications for IoT projects using .NET MAUI and Avalonia with MongoDB and PostgreSQL, and collaborated with Agile teams to improve performance and release quality.
- Completed hands-on training in basic PLC (Programmable Logic Controller) operations and fundamental system development practices to support IoT integration projects.

Junior Software Engineer — Innocore Systems Solutions

Remote

May 2025 – Oct 2025

- Collaborated with backend developers and school administrators to streamline attendance, grading, and RFID security workflows for a school monitoring system.
- Implemented responsive UI components and maintained the company website, improving usability and engagement across devices.
- Integrated REST APIs and optimized Next.js routing and workflows, improving performance across the application stack.

PROJECTS

Skwela — School Monitoring & Management System

May 2025 – Oct 2025

- Designed the system architecture and implemented a user-friendly front-end for a school monitoring platform.
- Built dashboards and attendance modules with performance graphs to track student and teacher metrics.
- Implemented real-time check-in and check-out alerts to improve attendance monitoring.

Official Website: <https://www.skwela.io/homepage>

Personal Portfolio

- Designed a decentralized portfolio integrating Supabase for real-time subscriptions and authentication.
- Implemented a dynamic blog module and containerized the application using Docker.
- Automated deployment to Azure Container Apps using a GitHub Actions CI/CD pipeline.
